

Mobile power

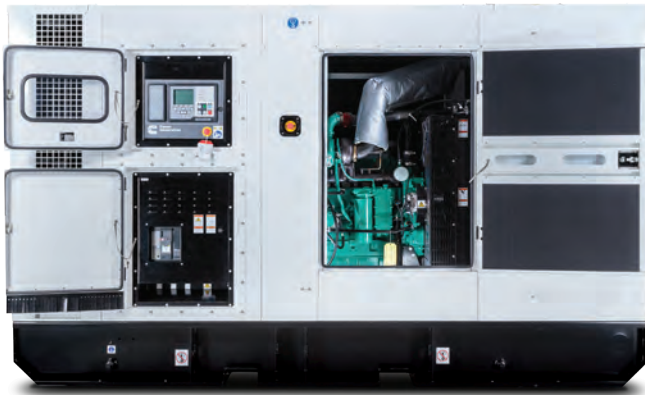

DELIVER THE SIMPLICITY AND RELIABILITY THAT ALWAYS PERFORM

The flexibility, control and reliability to make everything happen

When your customers rent Cummins mobile power systems from your fleet, they know those systems are up to the job. No matter the power challenge. No matter the site. No matter how rough the conditions. They have precisely the power customers need, with simple controls that get the power up and running, and the Cummins reliability that ensures that power is always on.

As a global provider of reliable mobile power systems, Cummins knows the rental power business inside and out. Now we've stepped up to make sure you can deliver exactly what your customers need: full power and total control. With Cummins' reliable products, it all comes together for your fleet: a full range of customized systems sharing the same simple controllers, with easy installation and immediate local support.

WHEN IT'S TIME TO PERFORM, YOUR CUSTOMERS WILL HAVE ALL THE POWER

We've got the full range of mobile power systems:

- Basic or full-featured generator sets to cover any industry need, critical application and every budget ranging from:
 - 12–500 kW Tier 4 Final certified range
 - 40–500 kVA unregulated range
- Reliable, pre-integrated systems designed to work together, using the same controller on every platform
- Configurations and features fully compliant with local requirements and regulations
- Load banks, fuel tanks, transformers, distribution panels and power cables on-site for single or multiple mobile power solutions
- Hardened enclosures to withstand the harshest conditions
- Easy access for easy maintenance — plus local Cummins service and support

THE MOBILITY, SIMPLICITY AND RELIABILITY TO OUTPERFORM

Tell us the generator set configurations and wide range of power you want in your rental fleet. Choose the controls and user interface you want installed on every unit, so any customer can operate any generator set easily and quickly change voltages for more flexibility and faster set-up.

Once up and running, your mobile generators will outperform customer expectations.

- Up to 29 hours of fuel capacity at 100% prime rating
- Same easy-to-use controls and user interface you chose to standardize your fleet
- Industry-leading containment capabilities, with 110% of all fluids within base frame
- Reliable performance in high altitudes and temperatures as well as low load and ambient conditions
- Paralleling and varying load level functionalities
- Effortless access to common maintenance items keeps the units running at top performance

WHATEVER YOUR CUSTOMERS NEED, THEIR RELIABLE POWER IS ON THE MOVE

Your customers want exactly the power they need — no more and no less — short-term and long-term. With reliable, cost-effective mobile power solutions, your rental systems are well-suited for:

- Prime power
- Temporary power for special events
- Backup power for scheduled maintenance
- Emergency power after a natural disaster

PEAK PERFORMANCE FOR ALL

The power to light up the stage and turn up the volume. To keep oil and gas operations running around the clock. To power the lights and tools at construction sites. Your rental fleet of Cummins mobile generators meets the needs of any customer in any industry.

- Entertainment and events
- Manufacturing
- Construction
- Data centers
- Oil, gas and mining
- Healthcare
- Media
- Hospitality
- Government
- Telecommunications
- Industrial, commercial and retail operations

MOBILE POWER TOUGH ENOUGH TO TAKE ON ANYTHING

With mobile power solutions from Cummins, you'll enjoy significant advantages: top performance; second-to-none reliability; technical innovations; application and configuration versatility; and more affordable options, emissions leadership and expert local service. Add in our worldwide rental business experience, and you'll also receive the best value in mobile power equipment for you and your customers.

EXPERT SERVICE AND SUPPORT, READY TO DELIVER

The components of a Cummins system are designed and built to work together, so you'll get a tightly integrated, proven and reliable product. You'll also benefit from having one source for service and support on every genset in your fleet. Our global distributor network has factory-trained and certified technicians ready to provide both scheduled and emergency service. In addition, our global stocking plan has fully stocked warehouses ready to deliver any replacement part you may need for your generator.
