Fire pump drive engine

CFP9E-F20
CFP9EVS-F20

Description

Engine series - Cummins QSL9 Series

Exhaust emissions - EPA Tier 3

With advanced electronics, higher torque, and better speed control, the CFP9E allows for shorter service times, longer maintenance intervals, increased fuel economy, and up to 50% less noise. This midrange engine with the Variable Speed Pressure Limiting Control (VSPLC) option provides an additional array of horsepower options than the CFP5E or CFP7E models.

Features

Variable Speed Pressure Limiting Control (VSPLC) - Cummins' VSPLC-equipped fire pump drive engines are capable of maintaining a constant pump discharge pressure by controlling the engine speed down to 1200 RPM, while still maintaining T3 emissions certification. VSPLC fire pump drive engines provide design flexibility in the fire pump system for high-rise applications; compensate for varying discharge pressure; allow the system architect to apply a larger pump and/or a pump with a steeper curve; and significantly reduce water consumption during the weekly test.

Certified power - The CFP9E-F20 complies with NFPA 20 and is UL 1247 Listed and FM 1333 Approved. The CFP9EVS-F20 complies with NFPA 20 and is FM 1333 Approved.

Control system - The industry-leading, state-of-the-art Fire Pump Digital Panel (FPDP) provides total fire pump drive engine system integration and intuitive operation, including:

- Color touchscreen;
- Dual microprocessors for critical signal redundancy;
- Standard J1939 parameter and Cummins fault code display;
- Engine idling;
- Electronic Control Module (ECM) self-diagnosis; and
- Optional Modbus field server remote messaging capability.

Warranty and service - Our models are backed by a comprehensive warranty and worldwide distributor network.
