

Cummins **Adapta™**

Cummins Adapta™ is a digital tool that monitors, manages, and optimizes electric vehicle (EV) charging operations. This cloud-based software is a valuable tool for any EV charger owner and provides important insights into the performance of EV chargers.

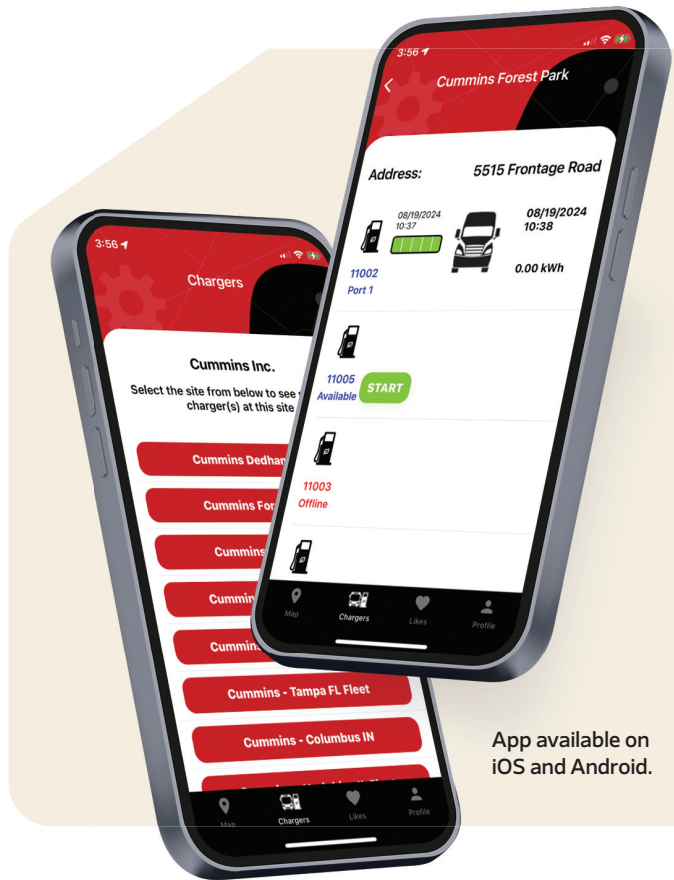

Cummins Adapta: Keeping you connected

Customers using Cummins Adapta will get the most out of their EV charging stations by:

- Gaining complete visibility into usage data
- Display of real-time status and location
- Remote control of charging activity
- Management of custom configurations
- Energy management options including charger scheduling, load balancing, first-in-first-out charging
- Billing management for public charging stations
- Ability to generate automated reporting on the health and operation status

Customers have the flexibility of accessing their data via a web portal, which does have some increased functionality, or as a mobile app, making the data easily accessible no matter where they are.

App available on
iOS and Android.
