

Trusted Power Solutions for Healthcare Facilities

Industry-leading reliability for uninterrupted patient care

Uninterrupted power, care and support

When every decision can be a matter of life and death, trust and reliability aren't just preferences; they're requirements.

Cummins Power System solutions are field-proven in thousands of the world's most respected healthcare facilities, including:

- Hospitals
- Outpatient clinics
- Ambulatory surgical centers
- Behavioral health centers
- Long-term care facilities

Meet codes and standards with confidence

Every Cummins product has been thoroughly tested for numerous failure scenarios and undergone endurance tests far exceeding industry regulations.

Hassle-free generator selection and easy-to-use GenSize tool simplify design and ease compliance concerns.

Remote monitoring enables seamless automatic maintenance logging and reporting.

Cummins Power System components are designed to meet or exceed the most relevant codes and standards for healthcare applications, including:

- IBC
- NEC 70
- HCAI / OSHPD
- CSA 282
- NFPA 110 and 99
- IEC / CE / RoHS

Trust in one

You can depend on Cummins as your single source for a fully integrated emergency power system — engineered, manufactured and supported by one expert team.

With one of the industry's largest global service footprints, Cummins delivers fast, consistent support through its entire distributor network. You'll always have a direct connection to the people who know healthcare power equipment best, backed by expert service and support when and where you need it.

- Best-in-class aftermarket capabilities are provided through your dedicated local contact, supported by a global system of service technicians, engineers and parts distribution centers.
- Technical support representatives always have the most up-to-date skills and equipment, with additional resources available on an as-needed basis.
- A fully integrated database enables you to search for parts from our robust inventory anywhere in the world.
- We're able to stand confidently behind every product because we make them all — there's no need to mix and match components from multiple vendors.
- All Cummins products are covered by a two- to three-year base warranty, with options to extend.

Rely on our expert team for design, procurement, installation and full project support.

Smart, sustainable power solutions for any healthcare facility

Cummins offers you scalable, flexible and sustainable power solutions that meet your requirements today while ensuring the freedom to expand in the future.

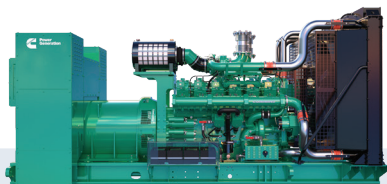

A full range of smart power solutions is available, including diesel, natural gas, emerging technologies, plus advanced system and microgrid controls. This robust portfolio ensures that you can find exactly what you need, from a single generator and transfer switch to parallel systems capable of powering an entire healthcare campus.

Whether you're looking for traditional emergency standby power, peak shaving strategies, integrating into a microgrid, or deploying combined heat and power (CHP), Cummins delivers smart, reliable power solutions to help you meet your sustainability, efficiency and resilience goals. We can provide every system component to ensure everything is connected under one single-source supplier.

Trusted Power Solutions for Healthcare Facilities

Power Onward™

Featured power solutions

CENTUM™ SERIES GENERATOR SETS

An award-winning, high-power, durable system that delivers precise, sustainable power in a compact footprint—no compromises.

BATTERY ENERGY STORAGE SYSTEMS (BESS) — AVAILABLE IN SELECT REGIONS

Cummins' BESS units provide safe, reliable energy storage for critical uses like healthcare—boosting resilience, reducing fossil fuel reliance, and easing renewable integration.

DIGITAL MASTER CONTROLS (DMCs)

At the core of every Cummins paralleling system, these customizable controllers undergo 1,200+ factory-tested failure scenarios for top performance, resiliency and uptime.

REMOTE MONITORING FOR SEAMLESS CONTROL

Cummins PowerCommand Cloud™ lets you securely monitor system status, detect faults, and receive real-time alerts from any device, cutting operational and maintenance costs.

POWERCOMMAND® B-SERIES AND X-SERIES TRANSFER SWITCHES

Designed for reliable, automatic power transfers, Cummins' smart switches feature patented blow-on technology with top UL1008 ratings and flexible over-current protection. B-Series models offer bypass isolation for maintenance without power interruption.

POWERCOMMAND® PARALLELING SWITCHGEAR

Cummins switchgear pairs rugged hardware with advanced controls for safe, reliable power in mission-critical settings. Built to UL and ANSI standards, it supports flexible bus configurations tailored to healthcare campuses.

Designed for easy integration

Cummins is a true single-source supplier, manufacturing and assembling every component of its power systems. This ensures exceptional design and performance control, delivering a more reliable, integrated system than any other provider.

This approach reduces complexity, speeds installation and commissioning, delivers maximum reliability, and meets constrained time and cost requirements.
