

Start your season right

Be prepared before you leave the harbour. Spring readiness services by a Cummins service provider and Cummins genuine on-board parts kits keep your vessel safe, reliable and ready anywhere.

Get your engine ready for adventure

Winter storage can leave your engine vulnerable to leaks, corrosion and wear. A spring check can be performed by a Cummins service provider and helps detect issues early and avoid costly repairs once the season begins.

SOME HIGHLIGHTS TO HELP YOU WITH A SMOOTH START TO YOUR BOATING SEASON

Fluids and filters

- Check and top up engine oil for clean lubrication
- Verify coolant level for proper protection
- Ensure filters are fresh to guarantee optimal performance

Coolant system

- Check water impeller, raw-water strainer and hose clamps

Belts and hoses

- Inspect for cracks, wear, and proper tension

Battery

- Make sure it is fully charged
- Verify if terminals are clean and secured

Anodes

- Replace if worn to protect against corrosion.

WHY IT MATTERS

Prevents breakdowns, avoids costly repairs, and helps you enjoy peace of mind all season long.

READY TO HIT THE WATER?

Store our engine and generator repair kits on board for worry-free boating

For added peace of mind, an Onboard Kit contains spare parts needed for an emergency repair when you're on the water, or in a remote location, with no access to a local Cummins service point. Buying a kit will also save you money in comparison to buying individual Genuine Cummins parts as and when you need them.

Example of an Onboard Kit pictured above, receive a free plastic carrying case with each purchased

Genuine Cummins on-board parts kits provide essential components for emergency or remote servicing, helping protect reliability wherever you operate.

Content	
Fuel filter	✓
Oil filter	✓
Fuel water separator	✓
Water filter (QSM only)	✓
